- I have built this project using turtle module in python. It's a replica of nokia phone snake game.

Arcade Game | Python

April 2021

- Developed a Arcade game using turtle library.

Volunteer Experience

- Campus Leader @ Code for Cause : Aspart of this program, I have been instructing people in the community about open source contributions and other technologies and I took a number of sessions on various technology. I have been Instructing c programming to thousands of students on [CodeforCause](#) youtube channel. Apart from this I promote code for cause in my college. youtube channel and also community members. Apart from it I promote codeforcause.
- Management Team Member @ Developer's student club - SIST : As a google's developer student club member I am currently working on a discord bot project using python. We help each other in the community regarding projects. Apart from this I also do mangement things like coming up with innovative ideas for events, planning an event, organising meetings, sessions, etc.
- Community Manager @ CodXCrypt Community : I am a community manager at codeXCrypt community which preliminarily focuses on open source and I conduct open source programs and help community people to get started with open source .

Extracurricular Activities

- I have participated in Hackathons. Apart from it I do Public speaking and Mentoring to the students in the projects.
